PROJECT-AT-A-GLANCE

EQUIPMENT INSTALLED

Ductless Heat Pump

FINANCIAL ANALYSIS

\$5,571

PROJECT COSTS

\$500

INCENTIVES

ESTIMATED ANNUAL SAVINGS

3,995

ANNUAL KILOWATT
HOUR SAVINGS

BAKING IN THE SAVINGS

Connie and Bethani Higdon own and operate the Wildflour Café and Cupcake Chop in Washougal, WA, and they were in dire need of an HVAC solution.

The summers were too hot, and the winters were too cold, and they weren't getting by with the space heaters and the two ancient AC units. The building was also old and couldn't accommodate ductwork—making a Ductless Heat Pump system a great, energy-saving solution.

Since installing the Ductless Heat Pump system, the Higdons report even, comfortable temperatures and a noticeable decrease in energy costs.

With the new Ductless Heat Pump, Wildflour Café and Cupcake Shop has saved 3,995 kilowatt hours annually and received \$500 in utility incentives.

...the Higdons report even, comfortable temperatures and a noticeable decrease in energy costs.
