

Networked Lighting Controls Billing Content

Note for Utilities: This content may be incorporated into the delivery of customer electronic or paper bills to remind them of the energy-saving benefits of networked lighting controls.

NLCs: A Simple Solution for Energy Savings

Add controls, save energy, earn incentives

Networked lighting controls (NLC) are easier to install and operate than ever before. Ask your contractor about adding controls to your lighting project for better lighting and the most aggressive savings on the market. Plus, additional incentives for controls may be available to help reduce upfront costs.

The wireless connection means NLCs are easy to manage from an app with high-performance features that can increase occupant satisfaction and customer experience. Get these benefits and more that can help extend the life of your lighting system, reduce maintenance costs and improve your ROI.

The best light is in your control.
