

NETWORKED LIGHTING CONTROLS TOP 10 REASONS TO INSTALL NOW

Note for Utilities: The Top 10 Reasons document is designed for end-users. This content may be suited for a newsletter article, direct mail, email, or social post to help facility owners and property managers understand how networked lighting controls can benefit their facility. If you choose to cut and paste the content, please delete this intro paragraph.

Top 10 Reasons to Install Networked Lighting Controls

1. Saves more energy than buildings without controls.
2. Lowers overhead costs and reduces maintenance and repair costs.
3. Frees staff time to focus on other maintenance needs.
4. Easy to install right out of the box.
5. Wireless networking makes it easy to control from an app.
6. Better lighting system control may also improve light quality.
7. Flexibility makes it easy to adjust lighting as space needs change.
8. Better lighting improves employee productivity.
9. Integrates with other building systems to control daylighting, occupancy, materials inventory, conference room scheduling and more.
10. Utility incentives improve affordability and return on investment.
